Professional Summary

Information Systems graduate and Dean's Lister who builds software with AI-assisted development. Currently building RobMon, a creature-raising and battle game on Roblox, using Claude Code with Roblox Studio and Blender. Background in systems analysis, documentation and data validation from a capstone system and a data analyst internship. Comfortable owning a project end to end: designing the systems, steering the code, testing and writing it up.

Projects

RobMon | Roblox game, in development *2026 – Present*

- Designed and built a creature-raising game: 79 species in 5 types, 3 evolution stages, breeding, training, gear, shops and quests.
- Built server-side auto battles (1v1, 3v3, 6v6), an NPC trainer ladder, global leaderboards and saved player data in Luau.
- Created a Blender-to-Roblox pipeline: Python scripts model each creature from Roblox-native shapes, then rebuild it part for part in Studio.
- Developed with Claude Code through the Roblox Studio and Blender MCP servers; kept design, decisions and session notes in an Obsidian vault.

claude-tools | Windows desktop utilities, github.com/JasonEyeglass/claude-tools *2026*

- Built a project launcher and two always-on-top widgets (usage limits, running sessions) in PowerShell 5.1 and WinForms, with no install needed.

Portfolio website | React, Vite, JavaScript, HTML, CSS *2026*

- Built an interactive portfolio designed as a 3D page-turning book, responsive down to phone width.

System Analyst & Documentation Lead | Capstone: Student Advising System, KLD

- Mapped institutional rules and user requirements into system workflows.
- Validated database tables against the front-end forms to keep the data consistent.
- Wrote the system documentation, manuals and reports for the school.

Experience

Data Analyst Intern | CTP Red III Corp. *Feb 2026 – May 2026*

- Validated and organized worksheets tracking utility consumption for rented spaces.
- Reconciled account balances and transaction records against space-use logs.
- Cleaned and audited data in Excel (lookups, IF formulas, pivots) to produce monthly summaries.

Leadership

President | KLD Information Systems Society *2024 – 2026*

Vice President | ICDI Student Government *2022 – 2023*

Skills

Code: Luau (Roblox), JavaScript / React, HTML & CSS, Python, PowerShell, SQL / MySQL

Tools: Roblox Studio, Blender, Claude Code, Git & GitHub, VS Code, Obsidian, Microsoft Excel, Google Workspace

Other: Systems analysis, data validation, technical documentation · English and Tagalog

Education

Bachelor of Science in Information Systems | Kolehiyo ng Lungsod ng Dasmariñas *Graduated 2026*

Dean's Lister, 2022 – 2026

Certifications

Cisco Networking Academy (2024): Introduction to Data Science · Python Essentials 1 · Introduction to Cybersecurity
